

London, Gibraltar, Prague, Bucharest 21st of June 2021

Dear Quanto-siasts,

After April's exciting newsletter announcing that **QuantoPay®** received the **official approval from VISA®** we received so many wonderful messages from you and an amazing response from the fintech and blockchain community. **THANK YOU!** Thank you as well for all your patience with our Mobile Only Digital & Blockchain Bank of the Future. We are also looking forward to finally **GOING LIVE!**

The past two months have been full of final technical, legal, compliance and team challenges and we are expecting the next two months until **GOING LIVE** being not less challenging. In the meantime, here are some of the wonderful developments of our project:

- Throughout the past weeks we have been hiring new front and backend developers, with many more **open positions and respective posts on our webpage.**
- Up from July we are having a new managing director of our Europe HQ in Prague, a former CFO of a well known multinational joining forces in our supervisory board;
- We will have up from July a **new office in Romania**, mainly for technical and marketing support of the QuantoPay group;
- We partnered with one of the most important IT development companies in Romania, **Fortech**;
- EU governments approved blockchain specialized data administering company, **Workstream Solutions**;
- We are having the backing of **StarCluster**, one of the most famous European security blockchaing and fintech experts.

More on exciting new partnerships soon on **our new QuantoPay.com webpage**, to be released in the coming days, together with our new design and branding, which some of you have for sure already noticed on our social media platforms.

Many of you asking when QuantoCoin will be finally on the exchanges as we had announced in our last newsletter the 5th of May as an early option?

As we are in a strictly regulated environment of the financial world we have to accept and follow 100% regulatory, legal and compliance requirements, even those of our partners like VISA. As much as we would have loved that all of you would benefit from the past over half year crypto bull run, and seeing QuantoCoin being freely tradable on all the exchanges we have already onboarding agreements with and those which approached us, VISA and CONTIS made it clear that any crypto related activities of our QuantoPay group of companies would require prior approval from VISA.

While both, VISA and CONTIS, alongside with our KYC/AML partner ONFIDO and the crypto exchanges WAVES, LATOKEN and BINANCE already confirmed per se our QuantoCoin exchange listing, our QUANTOCOIN blockchain application onboarding and the QTC token listing will start only upon final VISA confirmation process right after QuantoPay GOING LIVE.

We are as impatient as you are, in particular as QuantoCoin was one of the pioneers of bringing blockchain into the financial world, but faced so many regulatory obstacles, but in each delay there is always an opportunity: as our existing blockchain (Waves Ethereum ERC-20 based) is soon turning into a dinosaur, we are using the remaining time till launch and have **partnered with numerous famous blockchain and crypto geeks to tune our blockchain fit for our second generation challenger bank.**

Whoever would like to contribute in our ongoing IEO as final ICO stage before listing is invited to obtain currently **at USD 55 per QTCT 1 until 30th of June 2021**. As the demand of QTCT has been substantially increased since our VISA approval, some of our advisers recommending to increase the price further but we would rather prefer the free market taking care about that.

In case you would like to join, just check our webpage www.quantocoin.io or go directly to <https://latoken.com/ieo/QTCT> to purchase easily via Credit Card.

There will be up from **1st of July a new promotion** for all those who contribute **at least 10 QTCT** on the LATOKEN exchange. They will be entitled to receive upon release a **free Special Crypto Edition of our QuantoPay – QuantoCoin - VISA cards**. To reserve your card just go directly to <https://latoken.com/ieo/QTCT>.*

* As always, before participating in our IEO/ICO or obtaining convertible notes, obtain proper advice and please read our T&C and White Paper on www.quantocoin.io.
