

Blockchain & Crypto powered by
 QUANTOCOIN™

Dear Quanto-siasts,

After all the exciting news from our January newsletter, we would like to share already now more exciting news and updates for the whole community.

In our last newsletter we announced our Waves to Binance Smart Chain migration and respective swaps for all those of you holding already Quantocoin Tokens.

As there have been many questions about the actual migration process for your **QTC Tokens** from the **Waves to BSC** on the **TIMEX exchange**, we have further below detailed once again what has to be done from your side.

Quantocoin Tokens are listed & Waves to BSC swap finalized!

While QTCT is freely available and tradeable for the public since January for now only on TIMEX.IO exchange, the waiting for those of you holding QTC Tokens from before the official listing is almost over as the whole swap has been finalized.

The migration is very easy. Please see explanation below, in our social media releases next days and on the www.TimeX.io blogs.

In the meanwhile, we encourage you to make use of the still quite low early listing price.

As a reminder from our last announcement: While we appreciated that the vast majority of our community voted for a listing price of USDT 75 per QTCT 1, which shows the great confidence in our amazing team and disrupting product, our advisers strongly recommended, amid the early listing and the 60% crypto market crash in December/January, to take it easy and start with a reasonable entry price of USDT 0.5, which would avoid a sharp immediate sell off and cashing in of prior contributors.

While the rest of the crypto market crashed the QTC had an increase in value of up to 100%, currently being traded around USDT 0.9, up from USDT 0.5.

2021 QuantoCoins from LATOKEN to be refunded

Of course, we thought about all of you who had contributed through LATOKEN of our QuantoCoin Tokens IEO in 2021. Amid the current situation we considered as fair and reasonable to ask LATOKEN to REFUND ALL YOUR QUANTOCOIN CONTRIBUTIONS made between January and December 2021. They just confirmed acceptance of our request and will inform each one of you who participated in the IEO about the process during the next few days.

Those of you who participated in the various IEO promotion rounds, please do send us to ico@quantocoin.io respective proof of it and as well evidence that you paid for the same amount for QTC tokens on TIMEX.IO.

Further exchanges listings in discussions

As we have been approached with questions for what kind of other exchanges we are going to be listed, we are happy to confirm that we are indeed in discussions with various exchanges. However, we must handle the listing processes with extra care and diligence, since we are falling under extra strict KYC and AML rules. Being a financial service provider, we are falling under the applicable laws and compliance regulations of the various UK and European regulatory authorities.

We are very happy from that perspective with the Australian regulated TIMEX.IO and before we will list anywhere else, the whole migration and swap process - including the KYC/AML level 4 process - must be concluded for the whole QTC blockchain through TIMEX exchange.

You may be surprised, but even exchanges like BINANCE will have to undergo our very rigorous compliance approval process and it is BINANCE which still has to prove itself in various European countries as being fully compliant with the respective AML requirements. However, we are confident that in both directions even with BINANCE a partnership will be possible soon.

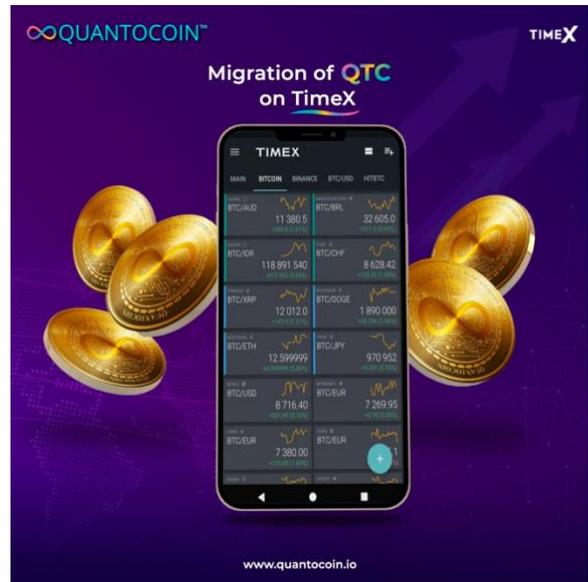

In the meanwhile, we are preparing the listing on CoinMarketCap and later Coin Gecko, which should be a process of a couple of weeks or even months, to be followed in a short term by one to two well picked centralized and one to two decentralized exchanges. The target for a full-fledged listing is after the GO LIVE of QuantoPay, which is anticipated for the early Q2 2022.

Up from the moment of full integration of our blockchain and DeFi integrations into QuantoPay we are expecting a great appreciation for our native QuantoCoin Tokens as part of the QuantoPay DeFi ecosystem.

So hurry and grab them now as long as they are on the early listing level!

Here are the important steps you have to follow for a smooth QTC migration:

- Ⓢ Please make sure that you have received all your QTC Tokens on the WAVES.EXCHANGE. There is a small final window of another month you may either pay eventually for your reservations made or to claim that you paid but did not receive your QTCT for whatever reason. In either case, please provide sufficient evidence and contact exclusively the following email address: ico@quantocoin.io.

- Ⓢ Please open your personal wallet/account on the TIMEX.IO exchange and register yourself **up to KYC Level 4**. Please make sure that you are only registering for yourself and read carefully, as always, our and TIMEX.IO terms and conditions. For the swap instructions TIMEX.IO is explicitly as well referring to our Terms & Conditions with respective links below:
 - <https://timex.io/blog/timex-lists-quantocoin-qtct>
 - <https://quantocoin.io/wp-content/uploads/2022/01/QTC-TC-FIN-1.8.pdf>

- Ⓢ Please note that you are accepting the respective Terms & Conditions by using either the TIMEX.io or QUANTOCOIN.io webpages and it does not require your explicit consent to the same, otherwise, as always, you are not allowed to participate in the swap or further trading.

- Ⓢ The KYC/AML process may take up to two weeks, depending on the number of requests and particular cases.

- Ⓢ In the meanwhile, you shall start migrating your QTC Tokens from your wallet on the WAVES.EXCHANGE to your newly registered WAVES TIMEX Exchange. In case you are surprised, the amazing CHRONO.TECH and TIMEX teams have integrated for the ease of your use WAVES on their exchange, which would be otherwise not so easy to migrate, being an entirely different blockchain.

- Ⓢ How to migrate your QTC to TIMEX has been nicely explained in one of the TIMEX.IO blogs under <https://timex.io/blog/how-to-swap-qtct-on-timex> . In case of questions please do reach out to their support team primarily, but in case of issues, you may ask our team under info@quantocoin.io as well.

- Ⓢ Once you have successfully passed the KYC/AML process together with most of all other early contributors, the WAVES to BSC swap will be executed by the CHRONO.TECH / TIMEX team. There will be a grace period of one to three months after which the migration and swap will not be possible anymore as the old WAVES Quantocoin Tokens will have to be all burned.
- Ⓢ For the protection of the value of Quantocoin tokens certain initial contributors, those holding in excess of QTCT 100,000, agreed to vesting periods of up to one year. These periods have been strictly included into our new smart contracts. Hence, old and new contributions into QTC will be protected against price manipulations and dumping by some QTC whales.
- Ⓢ All of you who acquire newly QTCs on TIMEX are not affected by the swap process. Since January they may already freely trade QTC against USDT: <https://timex.io/private/trading/QTCUSDT>
- Ⓢ Finally, stay tuned on our upcoming staking offers and tokenomics in our updated WHITE PAPER.

Keep an eye on our new www.QuantoPay.com webpage and our social media channels in the coming days to stay up to date with the latest news and promotions.
