

Dear Quanto-siasts,

First of all we hope you all had a good and healthy start into the New Year and neither Omicron nor the crypto market crash affected you too badly.

#UPDATES

Despite the obvious impact, we managed to stick as much as possible to the timelines, but with some adjustments as follows:

QuantoPay App is ready for testing!

We are most proud of having indeed had the best Xmas present as the QuantoPay Beta Test Version of our Digital & Blockchain Bank of the Future is available on Google Play and Apple Store for testing since 25th December 2021, however, only upon invitation.

Test and win EUR 100!

We believe the app is amazing! 200 lucky winners, who will be able to test and **win EUR 100** being uploaded on their **QuantoPay VISA cards** (upon release), will be announced on the **14th February 2022**. You may still participate in the draw till the last day. For those of you who are not the lucky winners and will have to wait till the public go live, you may have a sneak peek through one of our videos released up from the coming week too.

Final countdown

Just some important details to be finalized till QuantoPay will be live for EVERYBODY. We depend on when the so called “passporting” in the **30 EEA countries** and the manufacturing of our QuantoPay Visa cards have been finalized. Our partners **CONTIS | SOLARISBANK** are working hard to achieve this goal before the end of Q1 2022 as anticipated.

However, in the meanwhile our back-end, front-end, blockchain and DeFi teams are busy around the clock with some final adjustments and most important the preparation of further implementations after **GO LIVE**.

Our management, together with CONTIS | SOLARISBANK | VISA started the separate KYC/AML onboarding process for the **blockchain and crypto integration** after the initial GO LIVE of QuantoPay.

Together with our partners from **ONFIDO** (KYC/AML), **RHEINMETALL**, **ZTP** and **BIT SENTINEL** (PCI DSS, Cybersecurity), **MAZARS** (chartered accountants, Fintech and investment advisors) and last but not least, **VICO-CONSULTING** (digital research & marketing) we are currently paving the way for an amazing kick-off of **QuantoPay in Europe**.

Binance Smart Chain migration in progress

In our last newsletter we announced our Waves to Binance Smart Chain migration and respective swaps for all those of you holding already QuantoCoin Tokens.

As informed earlier our own blockchain and DeFi team partnered with the former CTO of CHRONO.TECH and we could finalize eventually all the swap preparations by mid-February 2022.

QuantoCoin Tokens are listed!

Despite the further delay of the QuantoPay GO LIVE and the very bearish crypto market environment we decided to stick to our promises and indeed started the listing of QuantoCoin Tokens.

While QTCT is freely available and tradeable for the public since January for now only on TIMEX.IO exchange, those of you holding QTCT from before the official listing will have to wait just a couple of days more, until the whole swap has been finalized. It's all very easy, but it requires your support as well. See explanation below, our social media releases next days and on the TimeX.io blog.

In the meanwhile, feel free to make use of our early listing super reduced listing price. While we appreciated that the vast majority of our community voted for a listing price of USDT 75 per QTCT 1, which shows the great confidence in our amazing team and disrupting product, our advisers strongly recommended, amid the early listing and the current bearish market environment (60% crypto market crash the past 80 days) to take it easy and start with a reasonable entry price of USDT 0.5, which would avoid a sharp immediate sell off and cashing in of prior contributors.
